	Key Questions	Answers/Notes		
Step 2	Scoping the assessment			
1.	What is the overall aim, or purpose of the function/ policy/service?	To provide a framework for employees to request flexible retirement and for Chief Officers to consider these requests.		
2.	What outcomes do you want to achieve with this function/ policy/service and for whom?	A policy that is compliant with the regulations governing the Local Government Pension Scheme, and that provides a transparent, fair and equitable framework for considering requests for flexible retirement.		
3.	Who is intended to benefit from the function/service/ policy?	Employees of the Council		
4.	Who defines or defined the function/service/policy?	The policy is drawn up by the Personnel Manager, discussed with the Council's JECC and Management Team, and considered in detail by the General Purposes Committee.		
5.	Who implements the function/service/policy?	The 2 Personnel Managers and the Management Team.		
6.	How do the outcomes of the function/service/policy meet or conflict other policies, values or objectives of the public authority (if	Please indicate which Sustainable Community Strategy (SCS) priority these outcomes relate to:  Safer place  Cleaner, smarter borough		
	applicable)?	Improving health &  reducing inequalities		
		Protecting & enhancing the environment		
		Good local transport  Strong economy & decent housing		
		Any other comments:		
7.	Are there any factors that could contribute or detract from the outcomes identified earlier?	Changes in the Local Government Pension Scheme Regulations, and changes in the Council's financial position.		

	Key Questions	Answers/Notes		
Step 3	Consideration of data and information			
8.	What do you already know about who uses this function/service/ policy?	The small number of those who have requested flexible retirement have had their requests agreed.		
9.	Has any consultation with service users already taken place on the function/service/ policy and if so what were the key findings?	Yes, qualitative research was undertaken with a randomly selected sample of potential users of the policy that included a small number of managers. The issues listed below were identified and have been accommodated within the draft updated policy.  1. The current policy does not provide the context of the spectrum of retirement options within the Local Government Pension Scheme (the LGPS). As a result much of what is contained in the current policy is incomprehensible to those who are "not in the know".  2. The current policy does not give any guidance to those who may wish to apply for flexible retirement as to what they need to do in order for their request to be considered.  3. The current policy does not set any tangible criteria for the granting of flexible retirement. What are the benchmarks according to which Chief Officers/Management Team might agree to a request? Concern was expressed that if there were not corporately agreed guidelines, there could be inconsistencies/inequities in the decisions that were made.  4. The current policy does not give any information about the implications of flexible retirement for an employee's ongoing contractual entitlements such as sick leave, holiday pay etc, or whether or not flexible retirees are able to continue paying into the LGPS. Without this information potential users of the policy are not able to make an informed decision as to whether or not to apply for flexible retirement.  5. Is it possible to "trial" a flexible retirement arrangement in the same way as it is for flexible working arrangements such as returning from maternity leave? If not , why not? If the policy is subject to annual equalities monitoring this should be stated in the policy and a commitment should be given to not identifying the names of individuals.		
10.	What, if any, additional information is needed to assess the impact of the function/service/policy?	None.		
11.	How do you propose to gather the	N/A
