---

Anthony

After another dip into the draft policy, I wonder if there should be consideration of sight tests under section 5.5. If the medical tests specifically include a sight test, then that would probably be sufficient. I do however think that the list in 5.5.6 should include reference to "Double vision" and "Vision disorder" or similar, as I'm not sure that visual impairment would necessarily be considered under the "other medical condition" clause.

Kind regards

Howard Rogers
