

### How the proposed changes will impact on applicants

A final equality impact assessment will be undertaken on the proposed changes following consultation on the draft amended housing allocation scheme. In order to inform this process, an initial assessment has been made on the impact of these changes on existing applicants, using a 'snapshot' of two data sets as comparators:

1,855 'live' applicants on 25.6.12 comprising 1,202 Homeseekers (65 per cent) and 653 tenants (35 per cent), and

430 'housed' applicants between 26.6.11 and 25.6.12 comprising 284 Homeseekers (66 per cent) and 146 tenants (34 per cent).

**Live applicants** – defined as all housing register applicants (homeseekers and tenants) who were able to participate in the bidding process on 25.6.12 (does not include those whose applications were pending or suspended on this date).

**Housed applicants** – defined as all housing register applicants (homeseekers and tenants) who have accepted the tenancy of a property they have bid for, where the tenancy start date falls between 26.6.11 and 25.6.12 inclusive (does not include those whose applications have been removed for any reason or those who have been offered a tenancy outside of the CBL system during this period).
