

Definitions of Audit Opinions

Previous

Green – Risk management operates effectively and objectives are met. *Overall audit opinion:* Expected controls are in place and effective to ensure risks are well managed and the service objectives are being met. Any errors found are minor or the occurrence of errors is considered to be isolated. Recommendations made are considered to be opportunities to enhance existing arrangements.

Amber – Key risks being managed to enable the key objectives to be met. *Overall audit opinion:* Expected key or compensating controls are in place and generally complied with ensuring significant risks are adequately managed and the service area meets its key objectives. Instances of failure to comply with controls or errors / omissions have been identified. Improvements to the control process or compliance with controls have been identified and recommendations have been made to improve this.

Red – Risk management arrangements require improvement to ensure objectives can be met. *Overall audit opinion:* The overall control process is weak with one or more expected key control(s) or compensating control(s) absent or there is evidence of significant non-compliance. Risk management is not considered to be effective and the service risks failing to meet its objectives, significant loss/error, fraud/impropriety or damage to reputation. Recommendations have been made to introduce new controls, improve compliance with existing controls or improve the efficiency of operations.

Revised

High	There is a sound system of control operating effectively to achieve service/system objectives. Any issues identified are minor in nature and should not prevent system/service objectives being achieved.
Substantial	The system of control is adequate and controls are generally operating effectively. A few weaknesses in internal control and/or evidence of a level of non-compliance were noted during the audit that may put a system/service objective at risk.
Adequate	The system of control is sufficiently sound to manage key risks. However there were weaknesses in internal control and/or evidence of a level of non-compliance with some controls that may put system/service objectives at risk.
Limited	Adequate controls are not in place to meet all the system/service objectives and/or controls are not being consistently applied. Certain weaknesses require immediate management attention as if unresolved they may result in system/service objectives not being achieved.
No Assurance	The system of control is inadequate and controls in place are not operating effectively. The system/service is exposed to the risk of abuse, significant error or loss and/or misappropriation. This means we are unable to form a view as to whether objectives will be achieved.
