

**Extract from the Capital Strategy relating to the 2017 Prudential Code**

- 1 The legislative framework is set out in the Local Government Act 2003 and its subsidiary regulations. This framework provides for a prudential system based on borrowing limits set by each individual local authority. Under this system, local authorities must have regard to affordability, prudence and sustainability and must follow the “Prudential Code for Capital Finance in Local Authorities 2017 Edition” published by the Chartered Institute of Public Finance and Accountancy (CIPFA).
- 2 The Prudential Code requires that a number of prudential indicators are set.
- 3 The objectives of the Prudential Code are to ensure, within a clear framework, that the capital expenditure plans are affordable, prudent and sustainable, and that treasury management decisions are taken in accordance with good professional practice and in full understanding of the risks involved and how these risks will be managed to levels that are acceptable to the Council. The Prudential Code requires authorities to look at capital expenditure and investment plans in the light of overall organisational strategy and resources and ensure that decisions are being made with sufficient regard to the long run financing implications and potential risks to the authority. Effective financial planning, option appraisal, risk management and governance processes are essential in achieving a prudent approach to capital expenditure, investment and debt.
