Published by the Kent Resource Partnership on behalf of the following KRP constituent councils:-

Ashford BC, Canterbury CC, Dartford BC, Dover DC, Folkestone & Hythe DC, Gravesham BC, Kent CC, Maidstone BC, Sevenoaks DC, Swale BC, Thanet DC, Tonbridge & Malling BC and Tunbridge Wells BC.

Information in this publication may be used without charge and without licence subject to the original context for information being maintained and the KRP accredited as the source.

Publication Date: April 2019

© Copyright 2019 of Sevenoaks District Council on behalf of the Kent Resource Partnership

Important: all data in this publication is derived from three main sources as follows: -

- Kent County Council is the primary source for tonnage information and residual waste destinations.*
- Waste Data Flow in terms of summary information on data input by the 13 councils.*
- Waste management companies in relation to countries of end destinations.*

The Kent Resource Partnership staff are entirely reliant on these sources and do not, and can not, produce original data themselves.

NOTE 1

This publication provides information on the total municipal waste in the Kent CC authority area. This includes waste (both recycled and non-recycled) that is not classified as household waste; either because it was collected as part of a commercial waste operation or because the material is not currently considered as household waste (even though it derived from a household) e.g. plasterboard, soil, rubble etc. Therefore Kent's household waste sent for reuse, recycling or composting (Ex NI192) of 46.7% (as validated by Defra's latest statistics), is calculated using a subset of the total tonnage data provided within this publication.

NOTE 2

For this financial year, some dry-recycling tonnage from the 13 Kent councils was processed through Materials Recycling Facilities (MRFs) or with companies who may send their feedstocks abroad (e.g. wood for biomass). The KRP thanks Viridor Waste Kent Ltd, Veolia ES Cleanaway (UK) Ltd and Countrystyle Recycling Ltd for the provision of information to us about the countries of end destination of their outputs. The KRP is very grateful for the co-operation shown.

NOTE 3

On the basis of industry experience for tonnages via charities, we have allocated tonnages 'abroad'. This includes items (e.g. clothes) that are collected by UK based charities and re-used by people in other countries.

NOTE 4

Waste Data Flow publishes information for 'Kent County Council' even though this is an amalgamation of all 13 Kent councils' information. Thus, the information for Kent Resource Partnership on pages 5 to 15 also incorporates all tonnages for Kent County Council.

Note 5

Every effort has been made to ensure the figures in this publication are correct. However, as the figures are based heavily on information from the national Waste Data Flow system, factors that impact on calculations are very likely to be replicated in this publication. Additionally, if the publication includes an inadvertent error, we would be pleased to be advised. In the first instance, please contact the KRP Manager, Paldeep Bhatti by email at: paldeep.bhatti@kentrp.org.uk

Foreword

*Cllr Rory Love OBE
Chairman of KRP & Cabinet Member for Customers,
Communications & Digital Delivery, Folkestone & Hythe DC*

*Cllr Jill Anderson,
Vice-Chairman of the KRP &
Deputy Mayor for Tonbridge & Malling BC*

On behalf of the Kent Resource Partnership (KRP), we are pleased to publish our Materials End Destinations for 2017/18. Latest analysis reflects the 13 Kent councils' sustained performance over the last five years, in terms of both how and where waste resource is processed.

Firstly, 46.7% of Kent's waste collected from households was sent for reuse, recycling or composting; an improvement of 0.4 percentage points compared to the previous year. With the continued commitment and support of our residents and our Partnership's councils, we remain confident of achieving 50% by 2020.

Secondly, we are proud to report that just 1.1% of Kent's municipal waste was sent to landfill; a staggering reduction of 17.1 percentage points from 18.2% landfilled in 2013/14. This is especially positive for Kent, given that England's county average for 2017/18 was 14.9%. As well as maximising the value of the resources collected, providing the best possible value for money for Kent taxpayers, it also reduces our environmental impact by minimising the greenhouse gas emissions created from landfill treatment. Pages 40 to 52 illustrate the five year journey for the 13 Kent councils.

And thirdly, the total municipal waste collected was down to just under 709,000 tonnes, a decrease of 3% from the previous year. Over three quarters of this total was processed here in Kent, 15% was processed in other parts of the UK, and less than 9% was sent abroad for further treatment.

We would like to thank the KRP's Manager, Paldeep Bhatti, and Projects Officer, Kate McCall, as well as Kent County Council's, Nichola Hood and Ben Frier, for their valuable work to produce this publication. We are also grateful for the continued co-operation from waste management companies Countrystyle, Veolia, and Viridor. We believe openness and transparency about where our waste goes helps Kent's councils maintain public confidence in their acclaimed waste services.

Kent Resource Partnership

The bar charts below represent the KRP's tonnage in terms of its geographical destinations (Kent, other UK or abroad) and resource destination (recycling & composting, electricity from waste & landfill) respectively.

Further details are provided overleaf.

Kent Resource Partnership: Contractor Details

The following information has been sourced, as best as possible and practicable, from Waste Data Flow and waste management companies. On pages 7 to 15, the ‘Kent Resource Partnership’ should be taken as referring to ‘Kent County Council’ on Waste Data Flow listings. (See Note 1 on page 4 for further details)

Every effort has been made to ensure the accuracy of details throughout the publication.
