Update regarding Tonbridge Station Interchange

Tim Middleton, Transport Innovations Programme Manager

- The main works have been completed at the station. However, as with all schemes we shall continue to monitor and make adjustments as required.
- KCC has identified the need for audible indicators on the lights and proposes to install these to be operational during the day-time only. This will avoid disturbing local residents during the night.
- We have ordered a stage 3 road safety audit which should highlight any areas of concern that may need to be addressed, if any. Once complete we shall carry out a final walk through with the contractor to record any construction defects that have arisen. The contractor is obliged to rectify any issues for up to a year after completion.
- The yellow box markings at the traffic signals have now been completed.
- The Road Safety Team are planning a 2nd site visit to determine the most suitable safety campaigns.
