

## 2021/22 Annual Investment Strategy Risk Parameters

The strategy includes parameters that aim to limit the Council's exposure to investment risks by requiring investments to be placed with high credit rated financial institutions and that those investments are diversified across a range of counterparties. More specifically the 2021/22 Strategy requires:

- Counterparties must be regulated by a Sovereign rated AA- (UK minimum of A-) or better as recognised by each of the three main rating agencies (Fitch, Moody's, and Standard & Poor's).
- Whilst 100% of funds can be invested in the UK, exposure to non-UK banks is restricted to no more than 20% of funds per Sovereign.
- Exposure to individual counterparties and groups of related counterparty must not exceed 20% of funds or 10% of funds if a housing association.
- In selecting suitable counterparties the Council has adopted Link's credit worthiness methodology. The methodology combines the output from all three credit rating agencies including credit watches / outlooks and credit default swap data to assign a durational band to a financial institution (100 days, 6 months, 1 year, 5 years, etc.). At the time of placing an investment the financial institution must be assigned a durational band of at least 100 days (based on credit ratings alone). This broadly equates to a minimum long term credit rating of Fitch A- (high) and a short-term credit rating of Fitch F1 (highest). A minimum of Fitch BBB (good), F2 (good) applies to UK nationalised banks.
- The duration of an investment in a foreign bank must not exceed Link's recommendation. For UK financial institutions Link's duration recommendation can be enhanced by up to 6 months subject to the combined duration (Link recommendation plus the enhancement) not exceeding 12 months. Where duration is being enhanced by more than 3 months the bank's CDS must be below the average for all other banks at the time the investment is placed.
- Money Market funds should be rated AAA and exposure limited to no more than 20% per fund. LVNAV (low volatility) or VNAV (variable net asset value) funds may be used as an alternative to CNAV (constant net asset value) funds.
- Enhanced Cash Funds and Government Liquidity Funds will be AAA rated and ultra-short duration bond funds rated AA or higher. Exposure is limited to no more than 10% of investment balances per fund and 20% to all such funds.
- Exposure to non-credit rated property funds is limited to no more than 20% (£3m) of expected long term cash balances. No limit applies where invested funds are derived from or in anticipation of new resources e.g. proceeds from selling existing property.
- Exposure to non-credit rated diversified income (multi-asset) funds and or short dated bond funds is limited to no more than 20% (£3m) of expected long term cash balances per fund and across all such funds.

All specified and non-specified Investments will be:

Subject to the sovereign, counterparty and group exposure limits identified above.

Subject to the duration limit suggested by Link (+6 months for UK financial institutions) at the time each investment is placed.

Subject to a maximum of 60% of funds being held in non-specified investments at any one time.

Sterling denominated.
