1. ACCOUNTING POLICIES

a) General

The Statement of Accounts summarises the Council's transactions for the financial year and its position at the year-end. The Accounts have been prepared in accordance with the *Code of Practice on Local Authority Accounting in the United Kingdom 2022/23*. The Code is based on levels of approved accounting standards:

- International Financial Reporting Standards (IFRS) approved by the International Accounting Standards Board (IASB).
- International Accounting Standards (IAS) approved by the International Accounting Standards Committee (IASC).
- Interpretations originating from the International Financial Reporting Interpretations Committee (IFRIC).
- Interpretations originating from the Standing Interpretations Committee (SIC).
- International Public Sector Accounting Standards (IPSAS) approved by the International Public Sector Accounting Standards Board (IPSASB).
- Financial Reporting Standards (FRS) approved by the Accounting Standards Board (ASB).
- Statements of Standard Accounting Practice (SSAP) approved by the Accounting Standards Committee (ASC).
- Urgent Issues Task Force's (UITF) Abstracts.

The accounting convention adopted for the preparation of these Accounts is an historical cost basis modified for the revaluation of certain categories of assets.

b) Qualitative Characteristics of Financial Information

- Relevance - in accordance with IAS 8 (Accounting Polices, Changes in Accounting Estimates and Errors) the objective of the principal statements is to provide information on the Council's financial performance that is useful for assessing the stewardship of public funds and for making economic decisions.
- Reliability - the financial information can be depended upon to represent accurately the substance of the transactions that have taken place. The Accounts are unbiased, free from material error, have been prepared in a prudent manner and have included all issues that would assist users to make adequate decisions on the Council's financial standing.
- Comparability - the Accounts contain comparative information about the Council so that performance may be compared with a prior period.
- Understandability - although a reasonable knowledge of accounting and local government is required, all efforts have been made in the preparation of the financial statements to ensure that they are as easy to understand as possible.
- Materiality - an item of information is material to the Accounts if its misstatement or omission might reasonably be expected to influence assessments of the Council's stewardship and economic decisions.

c) Accounting Concepts

- Going concern – it is assumed that the Council will continue in operational existence for the foreseeable future and accordingly the Accounts have been prepared on a going concern basis.

- Accruals - the financial statements, other than the Cash Flow Statement, have been prepared on an accruals basis. The accruals basis requires the non-cash effects of transactions to be reflected in the financial statements for the accounting period in which those effects are experienced and not in the period in which any cash is received or paid.
- Primacy of legislation - local authorities derive their power from statute and their financial and accounting framework is closely controlled by legislation. Where there is conflict between a legal requirement and an accounting standard, the legal requirement will take precedence.

d) Accruals and Revenue Recognition

Income and expenditure is accrued to ensure that it is accounted for in the year to which it relates, not when cash payments are made or received. In particular:

- Revenue from contracts with service recipients, whether for services or the provision of goods, is recognised when (or as) the goods or services are transferred to the service recipient in accordance with the performance obligations in the contract. • Supplies are recorded as expenditure when they are consumed – where there is a gap between the date supplies are received and their consumption, they are carried as inventories on the Balance Sheet.
- Expenses in relation to services received (including services provided by employees) are recorded as expenditure when the services are received rather than when payments are made.
- Interest receivable on investments and payable on borrowings is accounted for respectively as income and expenditure on the basis of the effective interest rate for the relevant financial instrument rather than the cash flows fixed or determined by the contract.
- Where revenue and expenditure have been recognised but cash has not been received or paid, a debtor or creditor for the relevant amount is recorded in the Balance Sheet. Where debts may not be settled, the balance of debtors is written down and a charge made to revenue in financing and investment income and expenditure for the income that might not be collected.
- Revenue relating to council tax and business rates will be recorded at the full amount receivable, net of any impairment losses. These transactions are deemed to be of a non-contractual, non-exchange nature in that there is no difference between the delivery of services and the payment of the debt raised.
- Income from garden waste customers is apportioned between years to account for the service that they have paid for in the current and following financial years.

Where income or expenditure has been recognised within the income and expenditure account, but cash has not been received or paid, a debtor or creditor for the amount stated will be recorded on the Balance Sheet. Where debts raised may not be settled, the balance of debtors will be adjusted by an impairment adjustment charged to the revenue account.

Exceptions to these principles are electricity, gas and similar periodical payments (excluding council offices) which are charged at the date of meter reading rather than being apportioned between financial years; and penalty charge notices, income from car parks, land charges income, licensing fees and planning application and building control fees which are accounted for on the day of receipt. This policy is consistently applied each year and its effect on the Accounts is not considered to be material.

e) Assets Held for Sale

Non-current assets that have been identified for sale by the Council will be reclassified as current assets when the asset is being actively marketed and has a high probability of sale within twelve months of the Balance Sheet date.

f) Cash and Cash Equivalents

Internally managed investments of three months or less from the date of acquisition will be recognised as cash equivalents (short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value). Externally Managed funds normally comprise of investments that cannot be easily realised and are excluded from this heading.

g) Council Tax and National Non-Domestic (Business) Rates

The Council is a billing authority which is required to bill local residents and businesses for Council Tax and National Non-Domestic Rates respectively. The Council acts as an agent for Kent County Council, Police and Crime Commissioner for Kent and Kent Fire and Rescue in respect of Council Tax and as such the Accounts show the amount owed by and to taxpayers in respect of our proportion of the Council Tax and the major precepting authorities as a net debtor or creditor.

Similarly, the Council acts as an agent for the Government, Kent County Council and Kent Fire and Rescue in respect of Business Rates and as such the Accounts show the amount owed by and to taxpayers in respect of our proportion of the Business Rates and the other bodies covered by the Business Rates Retention scheme as a net debtor or creditor.

In addition, included in the Comprehensive Income and Expenditure Statement is our share of the Collection Fund surplus/deficit for the year in respect of Council Tax and Business Rates, which is subsequently reversed within the Movement in Reserves Statement to the Collection Fund Adjustment Account in the Balance Sheet.

h) Contingent Assets and Liabilities

Contingent assets should not be recognised in the accounting statements, they should be disclosed by way of notes if the inflow of a receipt or economic benefit is probable. Such disclosures should indicate the nature of the contingent asset and an estimate of its financial effect.

Contingent liabilities should not be recognised in the accounting statements, they should be disclosed by way of notes if there is a possible obligation which may require a payment or a transfer of economic benefits. For each class of contingent liability the Council should disclose the nature of the contingency, a brief description, an estimate of its financial effect, an indication of the uncertainties relating to the amount or timing of any outflow and the possibility of any reimbursement.

i) Debt Write-Off

The Director of Finance and Transformation approves and or recommends the write-off of debt where efforts to collect the sums have failed and any further action would be uneconomic or impractical or in the opinion of the Director of Finance and Transformation there is a valid reason for not pursuing the debt. In order to mitigate the financial impact of write-offs the Director of

Finance and Transformation makes an impairment allowance taking into account the size and age of the debt outstanding and the likelihood of recovery.

j) Employee Benefits

Under the Code employee benefits are accounted for when the Council is committed to pay an employee. Employee benefits are split into three categories.

Benefits Payable during Employment

This covers:

- Short-term employee benefits, such as salaries and wages, paid annual leave and paid sick leave, bonuses and non-monetary benefits (e.g. cars) for current employees.
- Benefits earned by current employees, but payable twelve months or more after the end of the reporting period (e.g. long-service awards).

Termination Benefits

This covers costs that are payable as a result of either an employer's decision to terminate an employee's employment before the normal retirement date; or an employee's decision to accept voluntary redundancy in exchange for those benefits. They are often lump-sum payments, but also include enhancement of retirement benefits; and salary until the end of a specified notice period if the employee renders no further service that provides economic benefits to the entity.

In the event of notice of termination being served on an employee the known liability is recognised at the earlier of when the authority can no longer withdraw the offer of these benefits or when the authority recognises the costs of a restructure will involve the payment of termination benefits, any enhanced retirement benefits paid by the employer are accounted for on a cash basis.

Post-Employment Benefits

As part of the terms and conditions of employment of its employees, the Council offers retirement benefits. Although these benefits will not actually be payable until employees retire, the Council has a commitment to make the payments that needs to be disclosed at the time employees earn their future entitlement. The Local Government Pension Scheme is administered locally by Kent County Council – this is a defined benefit statutory scheme administered in accordance with the Local Government Pension Scheme Regulations 2014, is contracted out of the State Second Pension and currently provides benefits based on career average revalued salary and length of service on retirement, meaning that the Council and employees pay contributions into a fund, calculated at a level intended to balance the pension liabilities with investment assets.

Under IAS 19, the employer recognises as an asset or liability the surplus / deficit in a pension scheme. The surplus / deficit in a pension scheme is the excess / shortfall of the value of assets when compared to the present value of the scheme liabilities. A prerequisite of the introduction of IAS 19 was that it did not impact on taxation requirements. Where the contributions paid to the pension scheme do not match the change in the Council's recognised liability for the year, the recognised cost of pensions will not match the amount required to be raised in taxation. Any such mismatch is to be dealt with by an equivalent appropriation to or from a pension reserve. The Balance Sheet will show the net pension asset or liability and an equivalent pension reserve balance.

Contributions to the pension scheme are determined by the Fund's actuary on a triennial basis. The most recent actuarial valuation was on 31 March 2022 and will determine contribution rates for the three-year period from April 2023 to March 2026.

k) Events After the Balance Sheet Date

Events after the Balance Sheet date are those events, favourable and unfavourable, that occur between the Balance Sheet date and the date when the Accounts are authorised for issue.

The authorised for issue date is:

- When the Accounts are signed by the Council's Section 151 Officer for approval by Members and published with the audit opinion and certificate which should be by no later than 30 September 2023.

Events arising after the Balance Sheet date and before either of the two dates above will be reflected in the Accounts if they provide additional evidence of conditions that existed at the Balance Sheet date and materially affect the amounts to be included (adjusting events). Such events:

- could materially alter an estimate of, for example, debtors, creditors or an impairment allowance previously identified in the accounting processes;
- could substitute a materially different actual figure for an estimate; or
- could reflect a permanent impairment or betterment in the financial position, but only where the originating event took place prior to the year-end and the amounts are considered material to the Accounts.

l) Exceptional Items and Prior Period Adjustments

Exceptional items, when they occur, are included in the cost of the service to which they relate or on the face of the Comprehensive Income and Expenditure Statement if that degree of prominence is necessary in order to give a fair presentation of the Accounts. A description of any exceptional items will be given within the notes to the Accounts.

Prior period adjustments arise from corrections and adjustments that are the natural result of estimates inherent in the accounting process. Such adjustments constitute normal transactions for the year in which they are identified and are accounted for accordingly. Material adjustments applicable to prior periods arising from changes in accounting policies or from the correction of fundamental errors are accounted for by restating the comparative figures for the preceding period and adjusting the appropriate opening balances for the cumulative effect.

m) Financial Instruments

Financial instruments are broken down between financial assets (cash, investments and some categories of debtors) and financial liabilities (loans payable and some categories of creditors).

Although there are three classifications for the valuation of financial instruments, only two are relevant to the types of investments held by the Council, being either amortised cost or fair value through profit and loss (Comprehensive Income and Expenditure Statement).

Debtors and creditors are measured at fair value and are carried in the Balance Sheet at amortised cost.

Investments are broken down in two ways. Firstly, by maturity, in that any investment with a maturity date of more than 364 days after the Balance Sheet date will be classed as long-term and less than as short-term; and secondly by class of asset such as amortised cost or fair value through profit and loss.

Loans and receivables are assets that have fixed or determinable payments, but are not quoted in an active market, these are measured at fair value and are carried on the Balance Sheet at amortised cost.

Assets classified as fair value through profit and loss have a quoted active market price and do not have fixed or determinable payments. These are measured and carried on the Balance Sheet at fair value through profit and loss.

Accrued interest is shown as part of the investment balance. This is a departure from the Code which requires accrued interest to be shown as part of the debtors balance. Accrued interest receivable within 364 days of the Balance Sheet date will be recognised as part of the short-term investment balance on the Balance Sheet, irrespective of the date of maturity of the investment.

Gains and losses in relation to investments are recognised within the Comprehensive Income and Expenditure Statement under interest and investment income. Statute however requires unrealised gains and losses on investments classified as fair value through profit and loss to be subsequently transferred via the Movement in Reserves Statement to the Balance Sheet.

n) Foreign Currency Transactions

Any gains or losses arising from exchange rate fluctuations will be charged to the Comprehensive Income and Expenditure Statement in the year of payment or receipt.

o) Government Grants and Other Contributions

Revenue grants received are accrued and credited to the Comprehensive Income and Expenditure Statement in the same period as the related expenditure was incurred.

Grants specific to a service will be shown against that service expenditure line. General grant, e.g. Revenue Support Grant and New Homes Bonus are credited and disclosed separately in the Comprehensive Income and Expenditure Statement under taxation and non-specific grant income.

Capital grants and contributions (such as Section 106 developer contributions) received will be credited in full to the Comprehensive Income and Expenditure Statement on receipt where there are no conditions attached to its use and in the year that the capital expenditure is incurred where there are conditions attached to its use.

p) Inventories

Inventories are valued at the latest price paid. This is a departure from the requirements of the Code and IAS 2 (Inventories), which require stocks to be shown at actual cost or net realisable value, if lower. The difference in value is not considered to be material.

q) Leases

A lease is an agreement whereby the lessor conveys to the lessee in return for a payment or series of payments the right to use an asset for an agreed period of time.

A finance lease is a lease that transfers substantially all the risks and rewards incidental to ownership of an asset. Title may or may not eventually be transferred. An operating lease is a lease other than a finance lease. A definition of a lease includes hire purchase arrangements.

Finance Leases

The Council currently has no finance lease arrangements where it is the lessor or where it is a lessee.

Operating Leases

Lease payments under an operating lease shall be recognised as income or an expense on a straight-line basis over the lease term unless another systematic basis is more representative of the benefits received by the Council where the Council is a lessor or lessee respectively.

r) Non-Current Assets

The Council has set a de-minimis level of £10,000 for the purposes of capital expenditure. In the case where the individual value of an item, e.g. IT equipment is below the de-minimis level , but the aggregate value of similar items purchased in the year exceed the de-minimis level the expenditure may be treated as capital expenditure.

Property, Plant and Equipment

Property, plant and equipment are tangible assets (i.e. assets with physical substance) that are held for use in the production or supply of goods and services or for administrative purposes and expected to be used during more than one period.

Property, plant and equipment is split into five classes as described below.

Land and Buildings	Vehicles, Plant and Equipment	Infrastructure Assets
Community Assets	Assets Under Construction	

The policy for each type of asset is explained as follows.

<u>Land and Buildings</u>
The Borough Council has a policy of revaluing its property assets on a rolling programme such that the intervals between valuations do not exceed 5 years. The programme is as follows:

Asset Category	**Year of Valuation**	
Leisure Premises	2017/18	Completed
Properties for Community Use	2018/19	Completed
Public Conveniences	2019/20	Completed
Council Offices	2020/21	Completed
Car Parks	2021/22	Completed
Leisure Premises	2022/23	

In addition to the valuation of the asset category above the Code requires the Council to consider material changes in other assets not due for revaluation in year under the five year rolling programme. The Council's external valuers will undertake interim valuations in respect of our major assets, i.e. council offices, leisure premises and car parks where appropriate. Where the interim valuation shows a movement of £100,000 or more the Balance Sheet values will be updated accordingly. The Council's external valuers will also advise annually on any further work required to identify material changes in asset valuations.

The valuations reviews are carried out by a qualified surveyor in accordance with the latest guidance issued by the Royal Institution of Chartered Surveyors (RICS) and based on the market value for existing use or where a market value cannot be determined as the property is of a specialist nature the depreciated replacement cost. The method used on the current year's valuation will be explained in the notes to the Accounts. Items of plant that are integral to the operation of a building are included in the valuation for that building.

All buildings are subject to straight line depreciation over their estimated useful lives which range between 15 and 125 years depending on the building. In accordance with the Code land is not depreciated.

The Note to the Core Financial Statements in respect of Non-Current Assets provides details of the asset class, Land and Buildings, rather than for each of the categories listed above that make up that asset class. This departure from the requirements of the Code has no financial impact and is not considered to detract from the message being given to the reader of the accounts.

Under the Code the Council is required to consider componentisation of significant parts of an asset, where they are of a material financial nature or have significantly differing life expectancies. The Council, following a review of the property, plant and equipment asset registers has decided that the Council's offices and major leisure facilities will be the subject of componentisation if the replacement value of the component is significant in relation to the gross book value of the asset.

<u>Vehicles, Plant and Equipment</u>
Vehicles, Plant and Equipment, other than plant that is integral to the operation of a building, are recognised in the Balance Sheet at historic cost and are subject to straight line depreciation over a period of between 2 and 30 years.

<u>Infrastructure Assets</u>
These are non-current assets that are inalienable, expenditure on which is recoverable only by continued use of the asset created. Examples of Infrastructure Assets are street furniture, footpaths and signage.

These assets are carried on the Balance Sheet at historic cost.

These assets are subject to straight line deprecation over a period of between 3 and 40 years.

<u>Community Assets</u>
These are non-current assets that the Council intends to hold in perpetuity, that have no determinable useful life, and that may have restrictions on their disposal. Examples of Community Assets are parks and open spaces.

These assets are carried on the Balance Sheet at historic cost and are not subject to revaluation or depreciation.

<u>Assets under Construction</u>
This covers assets not yet ready for operational use, but expected to be operational within twelve months of the Balance Sheet date. Assets under Construction are not subject to revaluation or depreciation.

Heritage Assets

Heritage assets are defined as historical, artistic, scientific, technological, geophysical or environmental qualities that is held and maintained principally for its contribution to knowledge or culture.

Heritage assets where the Council holds information on their cost or value are to be recognised on the Balance Sheet which will normally be its insured value. Where the Council does not hold information on the cost or value and it is considered that the cost of obtaining this information outweighs the benefit to the reader of the accounts such details as the Council holds are to be included in the notes to the financial statements.

Heritage assets are not subject to depreciation.

Investment Property

Investment properties are those that are used solely to earn rentals and/or for capital appreciation. The definition is not met if the property is used in any way to facilitate the delivery of services or production of goods or is held for sale.

Investment properties are measured initially at cost and subsequently at fair value, being the price that would be received to sell such an asset in an orderly transaction between market participants at the measurement date. As a non-financial asset, investment properties are measured at highest and best use. The fair value of these assets can be attributed in three ways.

- Level 1 - Quoted prices in active markets for identical assets/liabilities that the authority can access at the measurement date.
- Level 2 - Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly.
- Level 3 - Unobservable inputs for the asset or liability.

For the purposes of investment property fair value will be determined at level 2 using market knowledge and indices on market values of compatible properties.

Properties are subject to revaluation on an annual basis in accordance with market conditions at the year-end.

Gains and losses on revaluation are posted to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement. The same treatment is applied to gains and losses on disposal.

Rentals income received in relation to investment properties are credited to the Financing and Investment Income line and result in a gain for the General Fund Balance. However, revaluation and disposal gains and losses are not permitted by statutory arrangements to have an impact on the General Fund Balance. The gains and losses are, therefore, reversed out of the General Fund Balance in the Movement in Reserves Statement and posted to the Capital Adjustment Account and the Capital Receipts Reserve.

Investment properties are not subject to depreciation.

Intangible Assets

These are non-current assets that do not have physical substance, but are identifiable and controlled by the Council through custody or legal rights. Intangible Assets held by this Council currently consist of IT software and associated costs.

Intangible Assets are recognised on the Balance Sheet at historic cost, are not subject to revaluation, but are amortised over their useful economic life assessed to be 5 years for IT software and associated costs.

Impairment of Non-Current Assets

A review for impairment of a non-current asset whether carried at historical cost or valuation should be carried out if events or changes in circumstances indicate that the carrying amount of the non-current asset may not be recoverable. Examples of events and changes in circumstances that indicate impairment may have been incurred include:

- a significant decline in a non-current asset's market value during the period;
- evidence of obsolescence or physical damage to the non-current asset;
- a significant adverse change in the statutory or other regulatory environment in which the Council operates; and
- a commitment by the Council to undertake a significant reorganisation.

In the event that impairment is identified the value will either be written off to the revaluation reserve, where sufficient reserve levels for that asset exist or written off to revenue through the Comprehensive Income and Expenditure Statement. Any impairment at the Balance Sheet date is shown in the notes to the core financial statements, along with the name, designation and qualifications of the officer assessing the value of the impairment.

Gains or Losses on Disposal of Non-Current Assets

When an asset is disposed of or de-commissioned, the net book value of the asset and the receipt from the sale are both charged to the Comprehensive Income and Expenditure Statement which could result in a net gain or loss on disposal.

Receipts in excess of £10,000 are categorised as capital receipts. The receipt is required to be credited to the usable capital receipts reserve and can only be used to finance capital expenditure. Receipts below £10,000 are considered de-minimis and treated as revenue.

The net gain or loss on disposals has no impact on taxation requirements as the financing of non-current assets is provided for under separate arrangements.

s) Overheads

The majority of management and administrative expenses, including buildings, are allocated to Services. Costs of Support Services are allocated on the basis of estimated time spent by officers on Services and costs of buildings are apportioned on a floor area basis.

t) Provisions

The Council sets aside provisions for liabilities or losses that are either likely to, or certain to be incurred, but uncertain as to the amount or the date on which they will arise. Provisions are recognised when:

- the Council has a present obligation (legal or constructive) as a result of a past event;
- it is probable that a transfer of economic benefits will be required to settle the obligation; and
- a reliable estimate can be made of the amount of the obligation.

u) Reserves

The Council maintains both general and earmarked reserves. General reserves are to meet general rather than specific future expenditure and earmarked reserves, such as the building repairs reserve are for specific purposes. No expenditure is charged directly to a reserve, but is charged to the service revenue account within the Comprehensive Income and Expenditure

Statement, this is then offset by a reserve appropriation within the Movement in Reserves Statement.

v) Revenue Expenditure Funded from Capital Under Statute

This is expenditure of a capital nature on non-current assets not owned by the Council, for example house renovation grants. Under the Code this is revenue expenditure and as such the expenditure is charged in full to the relevant service revenue account in the Comprehensive Income and Expenditure Statement in the year it is incurred. Statute, however, allows such expenditure to be funded from capital resources. In our case such expenditure is mainly funded from reserves.

w) Value Added Tax (VAT)

VAT is included within the Comprehensive Income and Expenditure Statement, whether of a capital or revenue nature, only to the extent that it is irrecoverable.
